

AdjuWorx Amball

Nonionic Surfactant Humectant

PRINCIPAL FUNCTIONING AGENTS

- Glycerin, diethylene glycol and alkyl polyglucoside . . . 92.2%
- Constituents ineffective as spray adjuvants 7.8%
- Total 100%

APPLICATION DIRECTIONS

- 1-4 pts/100 gal
- Recommended for use with a broad range of crops when tank-mixing active ingredients like glyphosate, paraquat, 2,4-D and dicamba.

PACKAGE SIZE

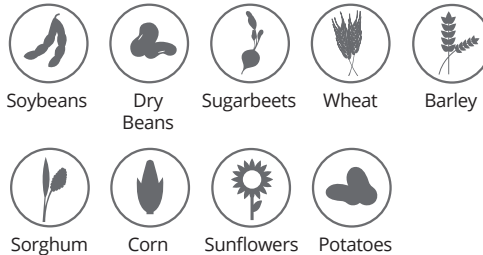

- 2x2.5 gal
- 275 gal

FEATURES AND BENEFITS

- **Quality surfactant that increases spreading and sticking of pesticides on the leaf surface.**
- **Humectant that slows drying time of spray droplets for increased active ingredient uptake.**
- **Helps get by weed defenses like leaf hair, wax, and other material for better contact to drive in active ingredients.**

AdjuWorx Amball is a general use 90% surfactant that can be used in a variety of applications. Adding Amball to an application can be the difference between complete weed control and very little weed control. Many of the weeds we combat have characteristics that make it hard for a droplet to make adequate contact with the leaf including hairs, crystalline structures, wax, or even being upright in nature. Adding Amball increases the spreading and wetting of spray droplets to overcome these obstacles and create better contact with the leaf to deliver more active ingredient for a better kill. Additionally, Amball contains a quality humectant that helps keep a droplet from drying out on the leaf surface. The longer a droplet takes to dry down, the longer the active ingredient has to get into the plant.
