

AdjuWorx Amplete

Drift Reduction Agent
Deposition Aid

PRINCIPAL FUNCTIONING AGENTS

- Modified vegetable oil, refined soybean oil 91.54%
- Constituents ineffective as a spray adjuvant. 8.46%
- Total 100%

APPLICATION DIRECTIONS

- Add Amplete to the spray tank after all other tank mix partners have been added to the tank. Avoid mixing with other undiluted products in an induction cone or any other container.
- Herbicides:
Ground: 3-4 oz/A
Aerial: 2-3 oz/A
- Fungicides and Insecticides:
2-3 oz/A

PACKAGE SIZE

- 2x2.5 gal
- 265 gal

FEATURES AND BENEFITS

- **Drift reduction and deposition agent.**
- **Increases performance of any application.**
- **Enhanced performance, stability and mixing for ease of use.**

AdjuWorx Amplete is a novel oil emulsion-based drift control agent that utilizes highly refined soybean oil for better performance and handling. Unlike other drift control agents that may create extremely large droplets to combat drift, Amplete produces a uniform, medium sized droplet that is denser and less prone to drift. Increasing the density of the droplet while maintaining optimal droplet size decreases droplet “hang-time” while providing excellent coverage. This also helps crop canopy penetration which is critical for increasing the performance of herbicides, insecticides, and fungicides later in the season. Amplete can be added to any application to help increase the performance.
